

ABOUT FINEQUITIES

What is Finequities?

Finequities is a social investing platform that combines the power of artificial intelligence (AI) with social networking features. It allows users to connect with a community of investors, access investment insights, and make informed investment decisions.

How does Finequities use AI in the platform?

Finequities leverages AI technology to provide users with personalized investment recommendations, portfolio analysis, and market insights. The AI algorithms analyze data, market trends, and user preferences to generate tailored investment suggestions and improve overall investment outcomes.

What are the benefits of using a social investing platform?

By using a social investing platform like Finequities, users can tap into the collective wisdom of a community of investors. They can discover new investment ideas, learn from experienced investors to broaden their knowledge and make more informed investment decisions.

Can I connect and interact with other investors on Finequities?

Absolutely! Finequities fosters a social community where users can connect with other investors, share ideas, and engage in discussions. You can follow other users and have the option to copy portfolios of successful investors (the copy portfolios feature will be ready soon).

How can I benefit from the AI-powered recommendations on Finequities?

The AI-powered recommendations on Finequities take into account various factors such as your risk tolerance, investment goals, and market analysis to provide tailored investment suggestions. These recommendations can help you discover investment opportunities, optimize your portfolio, and potentially improve your investment outcomes.

Is Finequities mobile app free to use?

Absolutely! Finequities app is completely free to download and use. You can access our social network, recommended portfolios, and other features without any charges.

Does Finequities make money if it's free?

While Finequities does not charge any fees to its users, we generate revenue through payment for order flow on crypto. This means that we receive compensation from market makers for directing customer orders to them for execution.

Are there any hidden fees or commissions?

No, there are no hidden fees or commissions. Finequities is transparent about its fee structure, and you can enjoy our services without worrying about any surprise charges.

Can I customize my investment portfolio?

Yes, you have the freedom to customize your investment portfolio. While we provide recommended portfolios, you can also build your own portfolio by selecting individual stocks, cryptocurrencies, and ETFs that align with your investment preferences.

Is my personal and financial information secure?

At Finequities, we prioritize the security and privacy of our users. We employ industry-standard encryption and security measures to safeguard your personal and financial information. Rest assured that your data is handled with utmost care and protection.

Is Finequities available for both iOS and Android?

Yes, Finequities mobile app is available for both iOS and Android platforms. You can download it from the App Store or Google Play Store, depending on your device.

Can I use Finequities if I'm a beginner with no investment experience?

Absolutely! Finequities is designed to cater to investors of all experience levels. Our user-friendly interface, educational resources, and the ability to follow and learn from experienced investors make it an ideal platform for beginners.

Is Finequities only for trading stocks?

No, Finequities provides access to a variety of investment options. You can trade stocks, cryptocurrencies, and ETFs, allowing you to diversify your investment portfolio according to your preferences.

How can I get support or assistance?

If you have any questions, issues, or need assistance, you can reach out to our support team via the in-app support feature or by emailing us at support@finequities.com. Our dedicated team is ready to help you with any queries you may have.

PORTFOLIO LEADERBOARD

What is the portfolio performance leaderboard on Finequities?

The portfolio performance leaderboard on Finequities is a feature that displays the performance of user portfolios in a ranked format. It shows the percentage returns of portfolios without revealing specific monetary values, giving users an idea of how other portfolios are performing.

How does the portfolio performance leaderboard work?

The portfolio performance leaderboard ranks user portfolios based on their percentage returns. It allows users to see the performance of other portfolios without disclosing the actual invested amounts. This helps users identify potential strategies and investors to consider when looking for portfolio ideas to follow or learn from.

Can I choose to participate in the portfolio performance leaderboard?

Participation in the portfolio performance leaderboard is optional. Users have the choice to join and make their portfolio visible on the leaderboard or keep their portfolio private. You can opt-in or opt-out of the leaderboard feature as per your preference.

How can the leaderboard help me in selecting portfolios to follow or learn from?

The portfolio performance leaderboard provides insights into the performance of other users' portfolios. By observing the strategies and returns of top-performing portfolios, you can gain inspiration and identify potential investors to follow or learn from. It can serve as a valuable reference to make informed decisions about portfolio selection.

Are the portfolios on the leaderboard vetted or verified by Finequities?

The portfolios displayed on the leaderboard are not vetted or verified by Finequities. They represent the performance of portfolios of users who have chosen to participate. It's essential for users to conduct their own due diligence and consider other factors before deciding to copy or follow a specific portfolio.

Can I see more details about the portfolios on the leaderboard?

The portfolio performance leaderboard primarily shows the percentage returns of portfolios without revealing specific details or investment amounts. However, you can click on a portfolio to access more information about the investor's strategy, holdings, and other relevant details if the user has made them public.

How often is the leaderboard updated?

The portfolio performance leaderboard is typically updated regularly, providing users with the latest performance data. The frequency of updates may vary, and Finequities aims to maintain an accurate and timely representation of the leaderboard.

Can I track my own portfolio performance on the leaderboard?

Yes, if you choose to participate in the portfolio performance leaderboard, your portfolio's performance will be included in the rankings. You can track your own performance relative to other portfolios and gain insights into how your investments are performing.

Can I hide or remove my portfolio from the leaderboard?

If you no longer wish to have your portfolio displayed on the leaderboard, you can opt-out at any time. Finequities provides settings and options to manage your privacy preferences and control the visibility of your portfolio on the leaderboard.

Does leaderboard performance guarantee future success?

The performance displayed on the leaderboard represents past performance and does not guarantee future success. It's important to conduct thorough research, consider various factors, and make informed decisions when selecting portfolios to follow or learn from. Historical performance alone should not be the sole basis for investment decisions.

COPYING PORTFOLIOS*

*Feature will be available soon

What is the portfolio copying feature in Finequities?

Finequities allows you to copy the portfolios of other investors on the platform. You can select an investor whose investment strategy aligns with your goals and risk tolerance, and your desired investment amount will be allocated proportionally among the assets held in their portfolio.

How does portfolio copying work?

When you choose to copy a portfolio, Finequities will replicate the positions held by the investor you are copying, based on their asset allocation. The investment amount you specify will be spread across the assets in their portfolio, ensuring that your investments mirror theirs.

Do I need any prior investment experience to copy portfolios?

No, you do not need any prior investment experience to copy portfolios on Finequities. The platform is designed to make investing accessible to users of all experience levels. By copying portfolios of experienced investors, you can benefit from their knowledge and strategies without needing extensive expertise.

Can I customize the copied portfolio?

Once you choose to copy a portfolio, Finequities will automatically replicate the positions held by the investor. However, you can customize the overall investment amount allocated to the copied portfolio based on your preferences.

Are there any restrictions on the portfolios I can copy?

Finequities offers a range of portfolios from various investors on the platform. You have the flexibility to select the portfolios that best match your investment objectives, risk tolerance, and preferences. However, it's important to review and assess the portfolios before making any decisions.

Can I stop copying a portfolio at any time?

Yes, you can stop copying a portfolio at any time. Finequities provides you with the flexibility to start or stop copying portfolios based on your investment needs. You have full control over your investment choices.

What happens if the investor I'm copying makes changes to their portfolio?

If the investor you are copying makes changes to their portfolio, Finequities will automatically update your copied portfolio to reflect those changes. This ensures that your portfolio stays in sync with the investor's updated positions.

Are there any fees associated with copying portfolios?

Copying portfolios on Finequities is free of charge. You can benefit from the insights and strategies of experienced investors without incurring any additional fees or charges.

How can I find suitable portfolios to copy?

Finequities provides tools and filters to help you discover suitable portfolios to copy. You can explore different investors, review their historical performance, risk profile, and investment strategies to make informed decisions.
